

Senior Network Engineer R&D - Palo Alto

The Criteo infrastructure team is responsible for planning, engineering, implementing and operating Criteo's global network of datacenters. Located in 6 different countries in the Americas, Europe and Asia.

Currently the team has 20 engineers spread across 3 offices in Paris, Palo Alto and Hong-Kong. We are looking for contributors to:

- Manage operational environments, suppliers and logistics relationships, service delivery activities in cooperation with contractors and third party providers
- Engineer custom hardware and software solutions to optimize costs and performance
- Participate in the design of our datacenters and their network infrastructure
- Lead datacenter and network operations to deliver the essential infrastructure for Criteo's goals in fast-moving environment
- Ensure availability, security and reliability of systems and networks in the production datacenters
- Ability to work across R&D teams to collaborate on projects implementation
- Occasionally dive under raised flooring and live the datacenter from the inside

Strong candidates qualifications

- BS in Computer Science, Electrical Engineering, Industrial Engineering or related field
- 5+ years of experience in datacenter or WAN operations in a 24/7 and critical services environment
- Project management, Agile is highly desired
- Python coding experience

Criteo R&D Culture

- **Empowerment** – We believe in hiring the best engineers in the industry and then letting them get on with what they do best – designing, coding and releasing state of the art software.
- **Mobility** – In our Voyager program our engineers get to pick which team they want to work on for 2-4 weeks, boosting collaboration, networking and maybe even leading to switching teams.
- **Agility** - We work in a fast pace environment where we build and release stuff frequently to deliver value soon and adapt to changes quickly.
- **Variety** – We have many ways to get your code to production including our Hackathon, 10% projects, Voyager and more.
- **Multicultural** – We have engineers from all over the world for you to interact and exchange ideas with.

Our culture keeps evolving, and you will be expected to contribute actively with new ideas to complement and enhance the existing programs that include frictionless internal mobility, 10% time, mentoring, technical talks, hackathons, conferences, etc.

Are you up to the challenge?

Do you want to know more about life in the R&D?
